

Payments and Charges

Payments and charges

All organisations submitting a request either for a new domain name, or a modification, in the .gov.wales or .llyw.cymru domains must have an Approved Registrar Membership Account with Jisc unless they are connected to the Janet network. There is no charge for organisations having an Approved Registrar Membership Account. However, this facility is generally only available to organisations who anticipate that they will be submitting a number of domain name requests through Jisc.

Jisc Customers

Charges for New Name Requests

Jisc customers have their first domain name in the .gov.wales or .llyw.cymru domains registered free of charge. If any subsequent domain names are required the standard charge of £100 plus VAT (at current rate) applies. However, they will not be charged any ongoing maintenance charges, as long as they remain connected to the Jisc Network. If they require subsequent domain names under any other domain under .gov.wales or .llyw.cymru, then the charge is £100 plus VAT (at current rate) per annum. Jisc will not undertake to register domain names administered outside of the UK.

Maintenance/Modification Charges:

Jisc customers will not be charged the maintenance fee for keeping their .gov.wales or .llyw.cymru registrations in the DNS, as long as they remain connected to the Jisc Network. They will also not be charged for any modifications to their DNS entries, provided the changes made keep the domain name within the Jisc Network.

Commercial Registrars

Charges for New Name Requests:

The charge for the creation of a new domain name is £100 plus VAT (at current rate). This includes the first two years' maintenance charge, which covers all reasonable changes to delegation of the zone associated with the name. The maintenance charge of £50 plus VAT (at current rate) will then come into effect two years from the date that the name was originally accepted by the Welsh Naming and Approvals Committee, and biennially thereafter. The Registrar holding the domain name on their nameservers will be invoiced at that time. It is therefore a requirement that the template for new name requests comes from the newly

designated Approved Registrar, since it will be this Registrar which will be invoiced for the maintenance charge at the two year point.

Maintenance/Modification Charges:

See modifying DNS entries ^[1]

Non-Payments:

If a Registrar fails to pay an invoice within two months Jisc reserves the right to remove the DNS entries for their customers for which no payment has been received. The consequence to the Registrar's customers is that they will lose their DNS entry and thereby their email and web access through this address.
