

Login Options

There are two ways you can login to your account on Vscene:

Login via your Vscene account

or

Institutional login

Login via your Vscene account

Once you have registered to use Vscene, you will be able to use the email address and password you originally registered with to access your Vscene account. Once logged in, you can change your password at any time.

Institutional login

If your organisation is part of the UK Access Management Federation ^[1], or the Irish Edugate service ^[2] you can use your institutional login details to access Vscene. To do this, you must have a Vscene account and create a link between your institutional account and your Vscene account.

Linking your Institutional account and your Vscene account on login:

- From the login page, before logging in, click the Institutional Login button and select your institution from the search result in the drop down list. You will be taken to a page at your home institution to enter you institutional credentials. Once this is complete you will be sent back to Vscene.
- You now need to enter the Vscene account details that you wish to link with. Once you have successfully entered you Vscene account details the linking is complete.
- On your following login if you, choose institutional login you will be automatically logged into your Vscene account.

You can view the status of the link, and un-link or re-link your account from your profile page and the linked account tab.

Either set of login credentials can then be used to access Vscene.
