UK e-Science certification authority

Group:

This Community is for the UK e-Science CA. The UK e-Science CA is an IGTF [1] CA which issues globally (but not universally) trusted certificates to grid and e-infrastructure participants (hosts and users) in the UK.

The purpose of this community is to collect and coordinate information relevant to the CA for/with the core stakeholders. One of the issues discussed here is the potential migration of the CA to the JANET Certificate Service [2].
